

Abhay Sharma

Full Stack Software Engineer

React.js | Node.js | Python | Django | TypeScript | AWS

abhaysharmajr@gmail.com | +91-7014216491 | [LinkedIn](#) | [Github](#)

Summary

Full Stack Software Engineer with 3+ years of experience building production web applications, RESTful APIs, AI driven workflows, and cloud-based automation. Hands-on experience across React.js, Node.js, Python, Django, TypeScript, AWS, SQL/NoSQL databases, and LLM integrations. Experienced in developing enterprise applications as well as end-to-end products in startup environments, with a focus on scalable backend services, responsive frontend interfaces, API performance, and automation

Technical Skills

- Backend: Django, Node.js, Express.js
- Languages & Databases: JavaScript (ES6+), Python, TypeScript, MySQL, MongoDB, C, Db2
- Frameworks: React.js, Next.js, Vite, Redux, TypeScript, Material UI, Shadcn/UI, Ant Design, Bootstrap
- Cloud & DevOps: AWS (S3, EC2, Lambda, API Gateway, CloudFront, EventBridge), Docker, Kubernetes, Nginx
- Tools & Others: Auth0, JWT, Git, Postman, Figma, Webpack
- Authentication & Tools: Auth0, JWT, Git, Postman, Figma, Webpack
- AI & Automation: OpenAI, GPT-5, Gemini, Grok, BeautifulSoup, Asyncio, Multithreading

Experience

Software Engineer - EXL Service, Remote

Apr' 26 – Aug' 26

- Designed and developed responsive, pixel-perfect invoice and receipt-style UIs using React, HTML5, and CSS3, including complex tables, headers/footers, and print-friendly layouts.
- Implemented secure backend services in Node.js to execute Db2 stored procedures and table functions, exposing data through RESTful APIs.
- Collaborated with data engineers and Db2 developers to understand existing stored procedures and reporting logic for accurate consumption from the web layer.
- Implemented robust error handling, logging, and monitoring for invoice and report generation services.
- Optimized front-end rendering and API performance for large and complex invoice datasets.
- Built export and print features, including PDF and high-fidelity print styles, with proper pagination, page breaks, and branding.
- Followed secure coding practices for authentication, authorization, and handling of sensitive customer and financial data.

Software Engineer - Consumable AI, Remote

Aug' 23 - Dec' 25

- Designed and implemented AI-driven workflows and agents using Django for automated research and SEO optimization pipelines.
- Created functionality to scrape website data using BeautifulSoup and analyze it via GPT-5, Gemini, and Grok LLMs, delivering advanced keyword and content insights for client websites in Django python.
- Developed and maintained 100+ RESTful python APIs powering an AI-driven SEO suite with real-time insights in Django.
- Built and deployed serverless automation using AWS Lambda, EventBridge, and API Gateway, optimizing email scheduling, blog publishing, and SEO reporting in Django python.
- Integrated Auth0 for secure authentication and access control, ensuring enterprise-grade user management.
- Implemented multithreading and asyncio in Django to efficiently handle concurrent data processing.
- Configured and maintained cron jobs for scheduled analytics, report generation, and automation tasks.
- Set up CI/CD pipelines using GitHub Actions and AWS for smooth deployment and version management.
- Built a React.js Chrome extension for real-time SEO diagnosis, triggering API calls for instant site analysis.

Project Works

- Job Portal App - Created a multi-role job portal for recruiters and candidates with JWT authentication and role-based dashboards.
- Applyra — AI Resume & Job Matching Platform | React / Next.js | Python / Django | AI.
- AI-based SEO Suite - Leveraged OpenAI for personalized content recommendations, built with Django and React.

Academic Details

MBA in Finance and Marketing - Rajasthan Technical University - 7.6 CGPA

Aug' 18 - Jan' 21

Bachelor in Science - Rajasthan University

Jun' 14 - Aug' 18
