- **Tools & Others:** Auth0, JWT, Git, Postman, Figma, Webpack

Experience

Full Stack Developer - Consumable AI, Remote

JUN'23 - PRESENT

- Designed and developed the complete React.js frontend for an AI-based SEO product, enabling real-time insights and user interactions
- Developed 100+ Scalable RESTful APIs using MERN Stack (MongoDB, Express.js, Node.js) and Python (Django)
- Built AI-driven workflows and agents for SEO automation and research pipelines
- Scraped and analyzed website data using Python (BeautifulSoup) and LLMs (GPT, Gemini, Grok)
- Built serverless automation using AWS (Lambda, EventBridge, API Gateway) for scheduling and SEO workflows
- Implemented Auth0 authentication and handled concurrent processing using multithreading and asyncio
- Built a React.js (JavaScript/TypeScript) Chrome extension for real-time SEO analysis via API integrations.

Senior Frontend Developer - Descriptive AI, Remote

JAN' 23 - JUN' 23

- Developed healthcare system for managing appointments, prescriptions, and reports
- Built React.js UI components, improving page load speed by 20%
- Debugged and resolved 50+ frontend issues, improving stability

Project Works

- **AI-based SEO Suite** – Built with Django, React.js, and OpenAI APIs for content recommendations
- **Job Portal** – MERN stack app with JWT authentication and role-based dashboards
- **AI Resume Optimizer** – Built using React (Vite) and FastAPI (Python) for ATS-friendly resume optimization
